· ABOUT ME ·

Software developer with passion for building elegant and efficient solutions that solve complex problems. Whether it's building a new feature or troubleshooting a bug, I approach each task with enthusiasm and a commitment to excellence. Competent in several development technologies, tools and methodologies, as Git/GitHub, CI/CD, SOLID, etc.

· TECHNICAL SKILLS ·

HTML/CSS   Javascript/Typescript   React

REST APIs   Node   ExpressJS/NestJS   SQL/MongoDB   Testing

· FEATURED PROJECTS ·

SCALES2CARE

A progressive web application that integrates the most commonly used risk assessment scales by healthcare professionals in hospitals, allowing them to spend more time on patient care.

Demo   Github

RECIPEAI

A delightful and robust AI-powered recipe recommendation app. Simply input the ingredients you wish to include, and the app will suggest a delicious recipe tailored to your preferences.

Demo   Github

TODOIST

A sleek and uncomplicated web application for managing your tasks. It features dark mode support, theme color customization and offline support out-of-the-box.

Demo   Github

GENPASS

A secure password generator, allowing you to customize the length and included characters, providing you with a quick and robust password for any service.

Demo   Github
